ENGINEERING PLATFORM

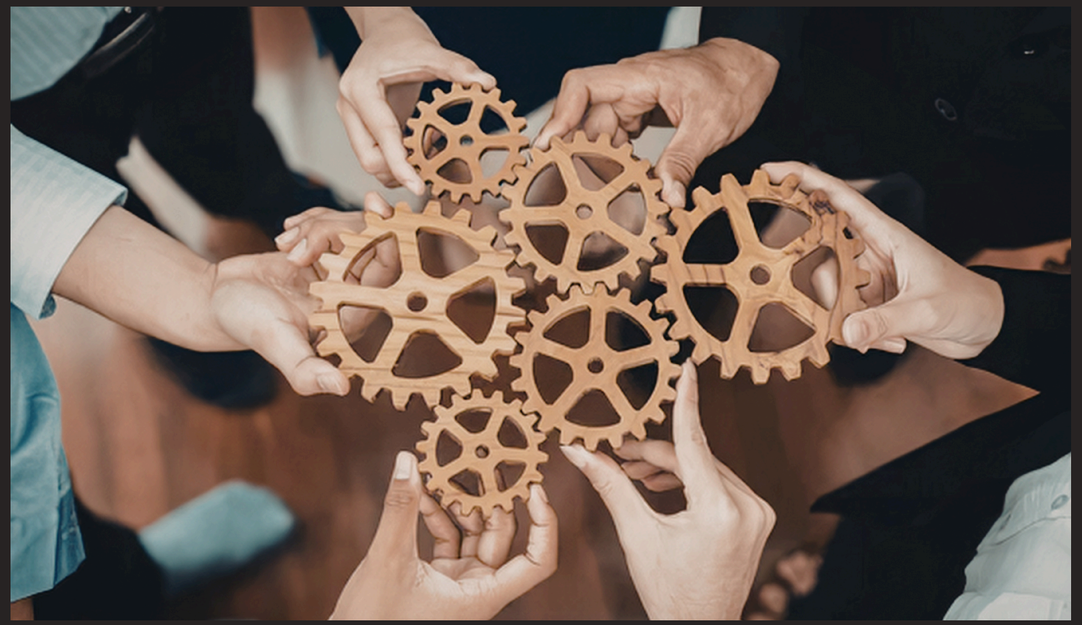

INTRODUCTION

Naichang Engineering Co., Ltd. is an engineering and industrial technology start-up focused on delivering innovative solutions through engineering expertise, AI, Big Data, IoT, and Smart Factory technologies to improve efficiency, reduce operational costs, and support industrial digital transformation.

The company operates through three core platforms: Engineering Services, providing industrial engineering solutions and technologies; Naichang Ma Share, Thailand's first engineering media platform powered by real engineers sharing practical industrial knowledge and innovation; and FiiX Store, a B2B industrial e-commerce platform connecting businesses, engineers, buyers, and suppliers through a smarter industrial ecosystem.

MISSION & VISION

MISSION

To deliver high-quality, innovative, and customer-focused solutions that drive growth and add value to our clients. We are committed to excellence, efficiency, and building long-term partnerships through integrity, transparency, and continuous improvement.

VISION

“To become a leading Engineering & Industrial Technology Ecosystem in Thailand, driving the future of industry through innovation, AI, Big Data, and engineering knowledge.”

NAICHANG ENGINEERING CO.,LTD.

ENGINEERING SOLUTION PROVIDER

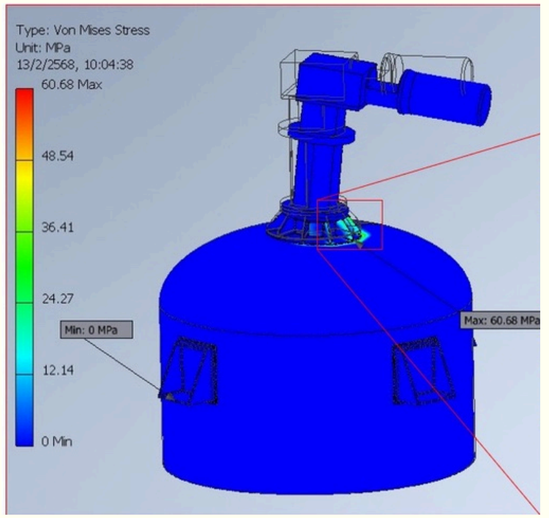

Naichang Engineering is an engineering solution provider that connects factories with the most suitable products, technologies, and services to solve industrial challenges effectively. We focus on understanding each customer’s specific requirements and operational problems, then identifying and recommending the right solutions from trusted suppliers and technology partners. Our goal is to help factories improve efficiency, reduce costs, enhance reliability, and achieve sustainable engineering solutions through the right products and services.

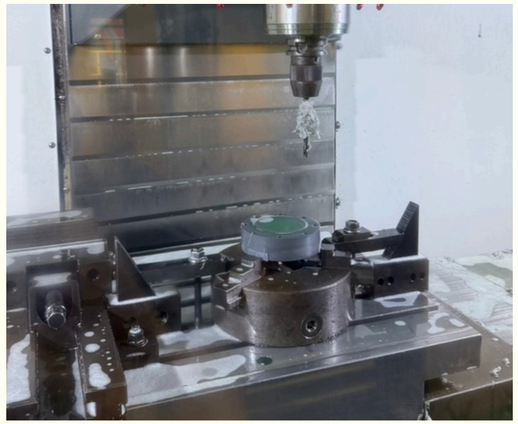

1. SOLUTION PROVIDER & CONSULTING

Naichang Engineering is an engineering solution provider that helps factories identify and solve operational challenges through the right products, technologies, and services. We analyze specific requirements, recommend suitable solutions, and connect factories with trusted suppliers and technology partners. Our role is to bridge engineering problems with practical, cost-effective solutions that improve efficiency, reliability, and overall industrial performance.

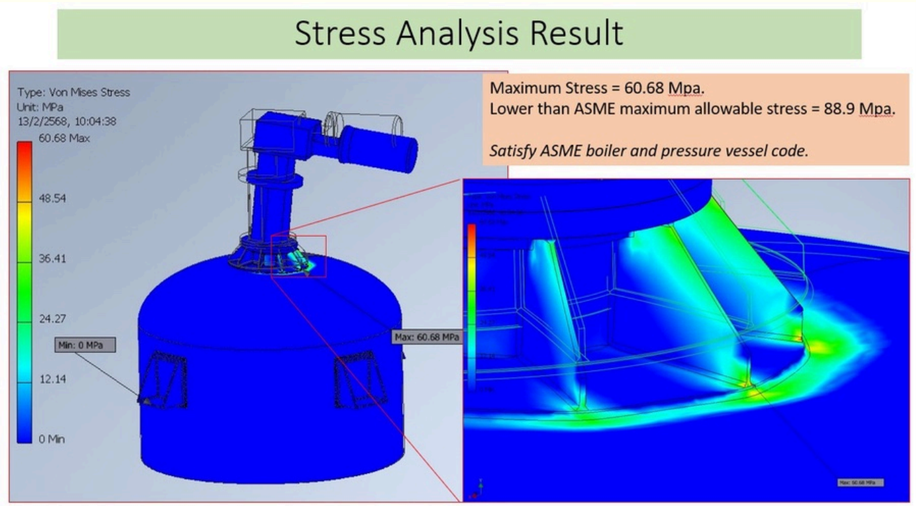

2. MAINTENANCE & INSTALLATION

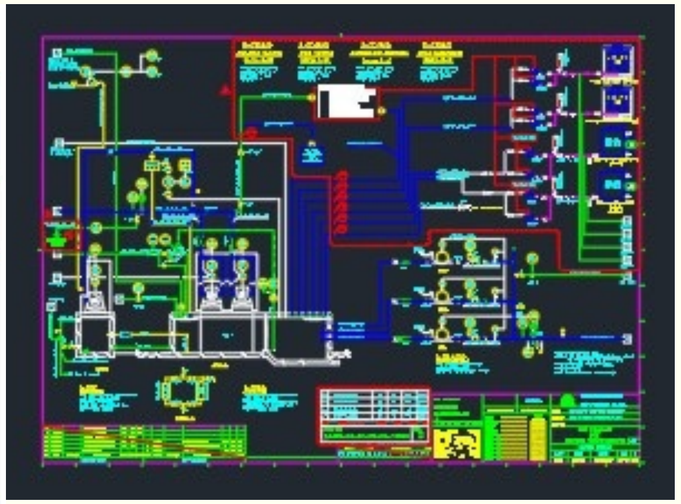

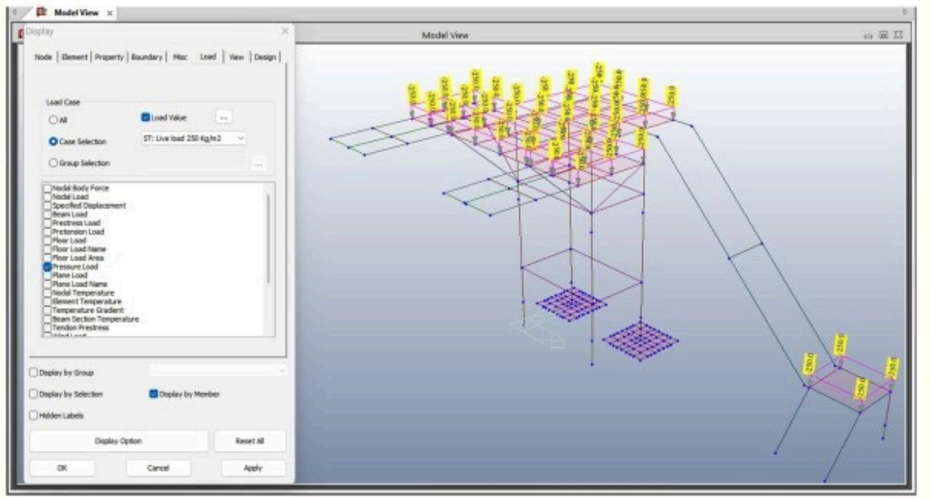

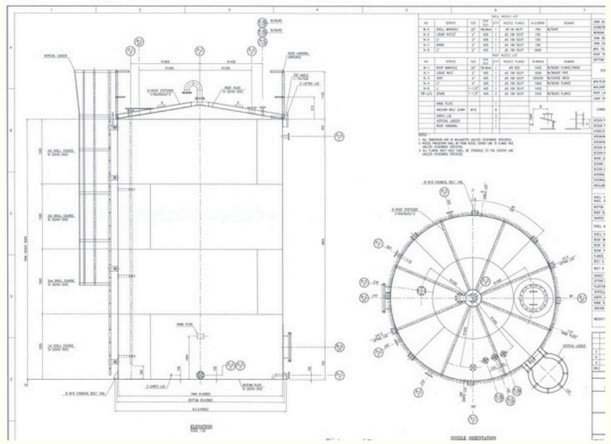

Naichang Engineering provides maintenance and installation services to support factories in maintaining reliable and efficient operations. We provide technical services for equipment installation, inspection, preventive maintenance, troubleshooting, and repair. Our engineering team works with customers to reduce equipment downtime, improve operational reliability, and ensure that industrial systems perform safely and effectively.

3. DESING & CALCULATION CERTIFICATION

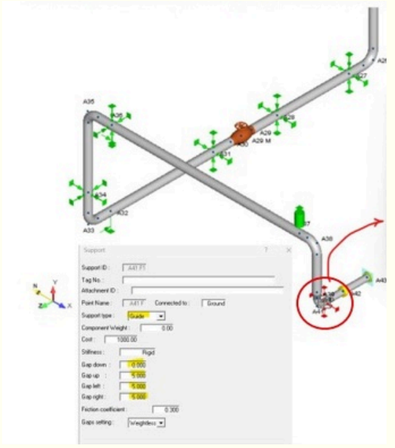

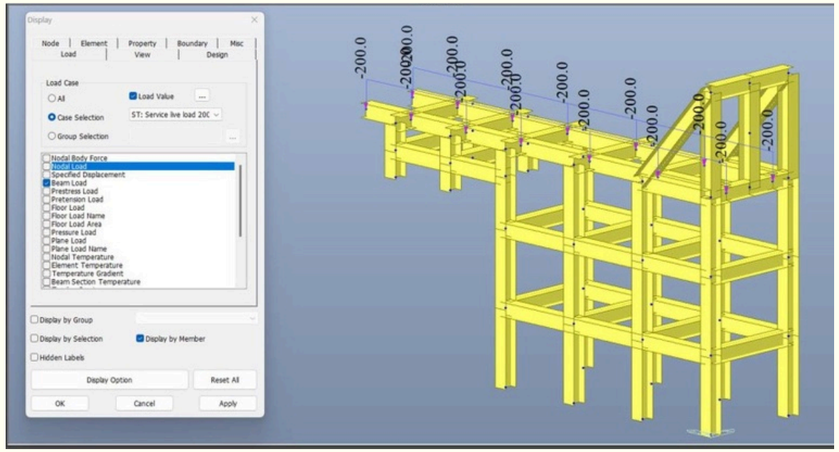

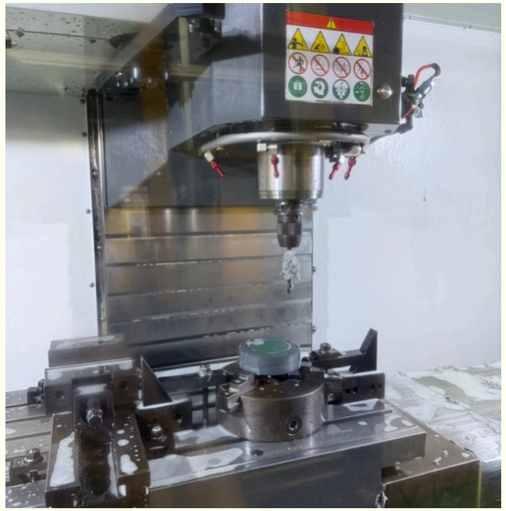

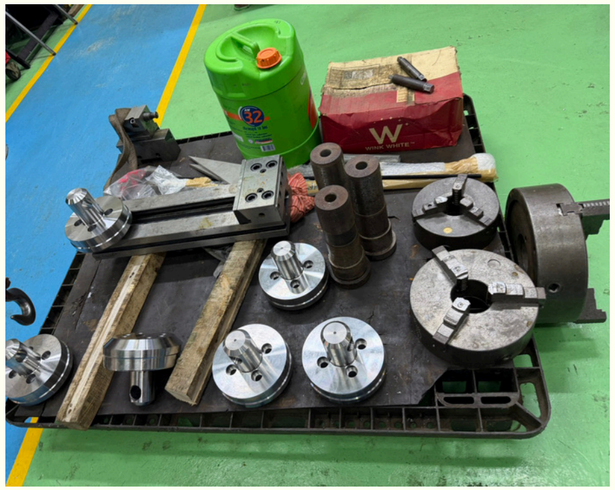

Naichang Engineering provides engineering design, calculation, and certification services to ensure that industrial systems and equipment meet required technical standards and safety requirements. We support factories with engineering calculations, system and equipment design, technical verification, and certification by qualified engineers. Our services help customers achieve reliable, compliant, and professionally engineered solutions for industrial applications.

4. FABRICATION & MADE TO ORDER

Naichang Engineering provides fabrication and made-to-order engineering solutions tailored to specific industrial requirements. We support customers from technical design and material selection to fabrication, modification, and final delivery, working with qualified manufacturing partners to produce reliable and application-specific solutions. Our services help factories address unique equipment needs, improve system performance, and achieve practical solutions beyond standard products.

INDUSTRY ENGINEERING MEDIA

“Nai Chang Ma Share (TH.Meaning Engnieering to share) is an industrial media platform that provides engineering knowledge, with a strong focus on directly reaching engineers and factories. It helps build brand awareness and generate high-quality leads effectively. The platform also serves as a business matchmaking hub between factories and suppliers, expanding marketing opportunities across the industrial sector.”

COMPETITOR IN THAILAND

*CIRCLE SIZE = STRONG BRANDING

TARGET MARKET

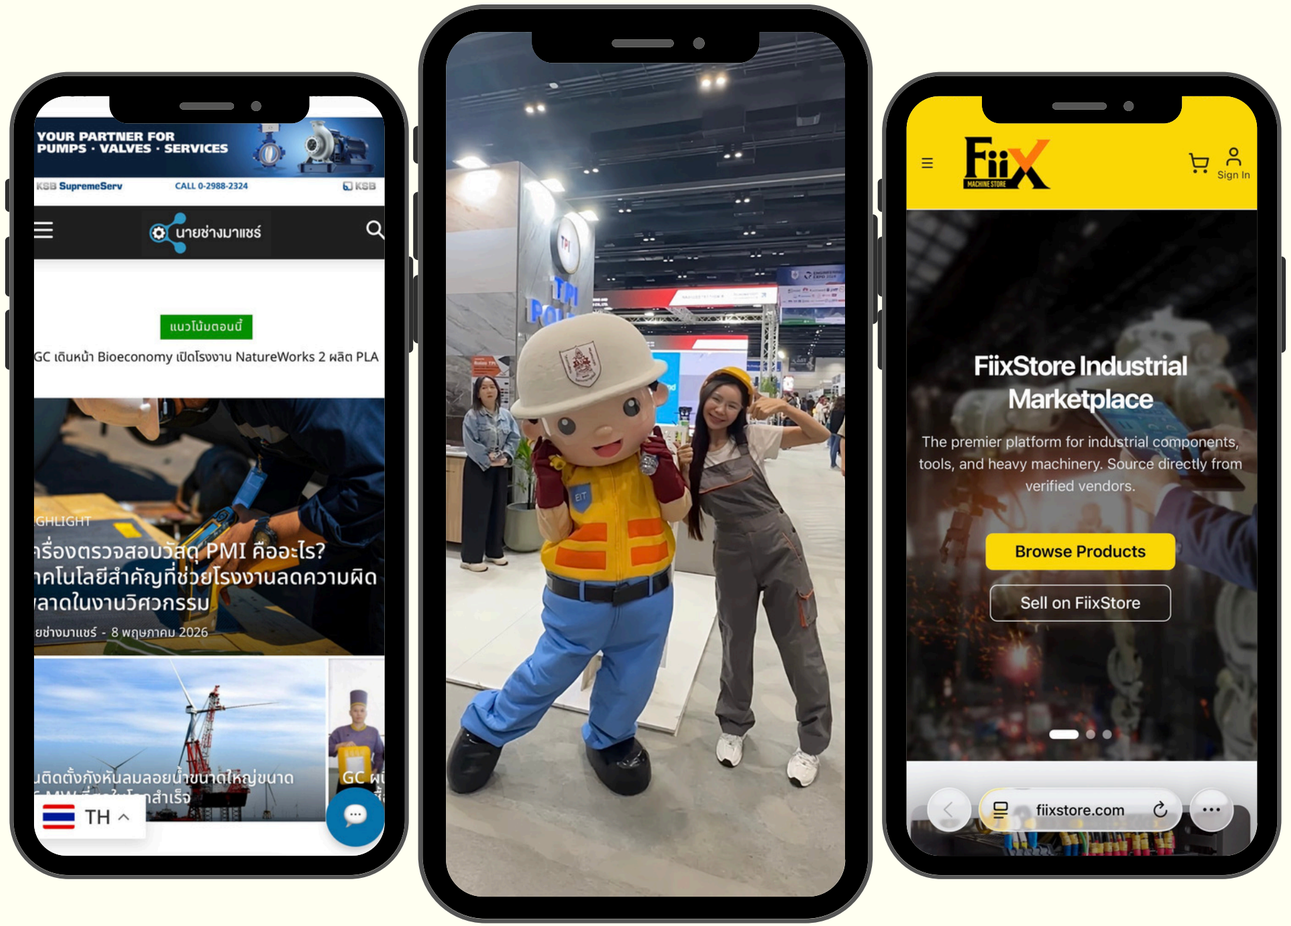

Naichang Engineering Co., Ltd. focuses on two main target groups: industrial product and service providers, and industrial factories seeking modern engineering and technology solutions.

Our customers include manufacturers, distributors, system integrators, EPC contractors, automation providers, industrial solution companies, and technology suppliers looking to expand their business network and market reach.

1. WEBSITE ADVERTORIAL

Publishing promotional articles for industrial products and services on the Nai Chang Ma Share website to achieve broad visibility.

The content is professionally written and optimized for SEO to rank on Google search results, with lifetime publication (no article removal).

Each article can include multiple media formats—such as images, documents, and videos—and will feature backlinks directing readers to the client's landing page.

After publication, the article will be distributed across social media channels to maximize reach and visibility.

Advantage

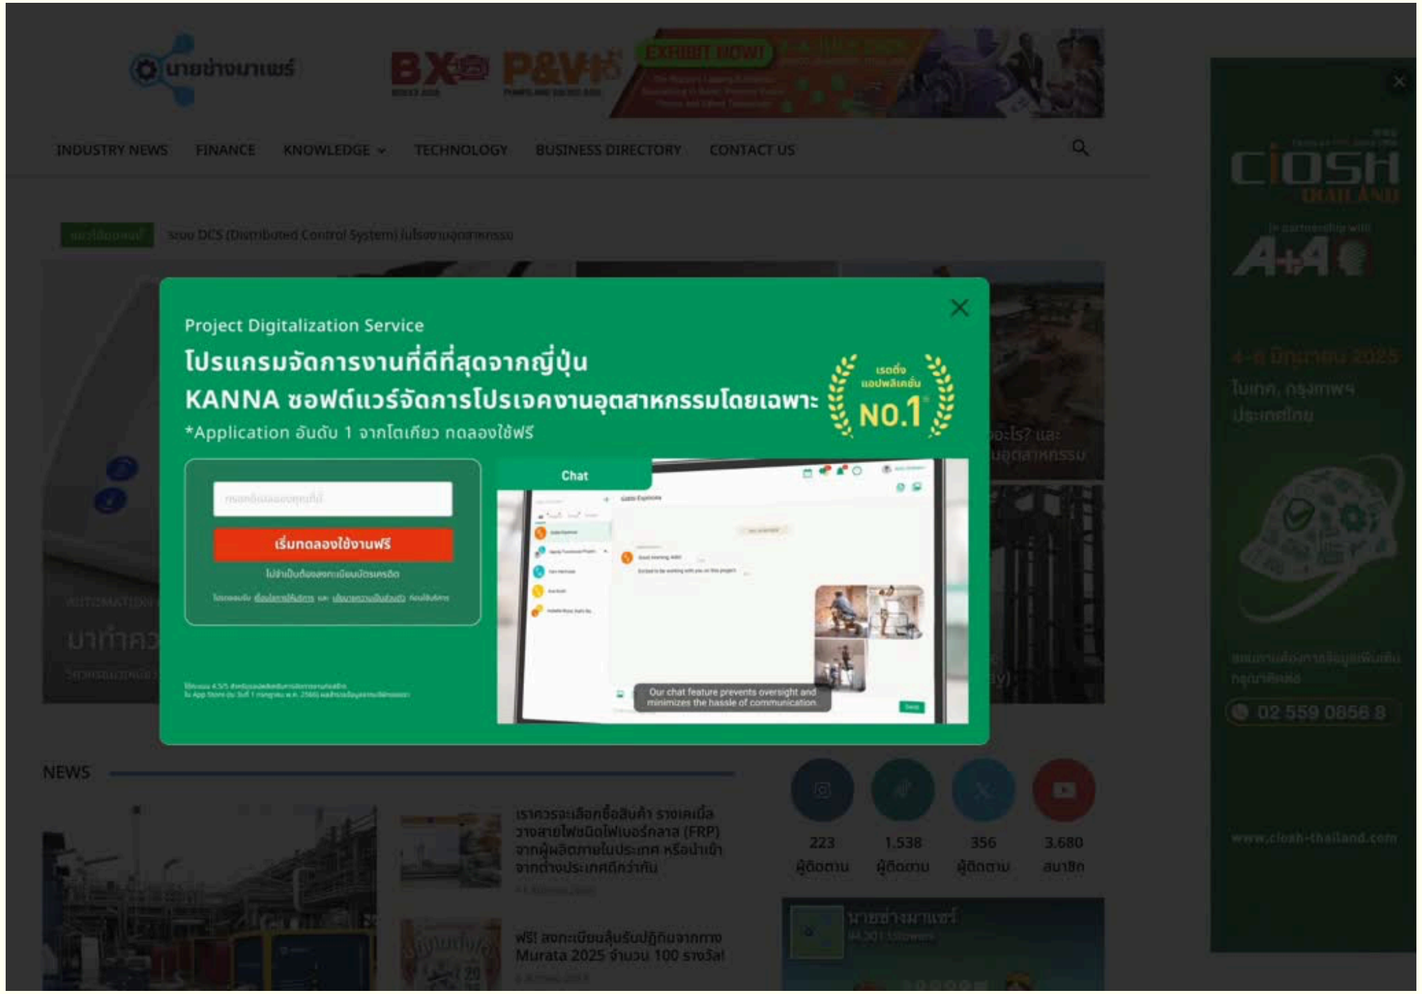

Content : ★★★★★

Awareness : ★★★☆☆

Engagement : ★★☆☆☆

2 WEBSITE BANNER

Description

One of the most effective promotional methods is industrial product/service advertising through banner ads, which enables brands to reach a large industrial audience and allows users to click directly through to the client's website.

Based on statistical averages, each banner receives approximately 10,000–30,000 impressions per month, with 50–100 clicks per day.

With these performance metrics, many clients have achieved strong results. Nai Chang Ma Share maintains exclusivity by not placing duplicate product banners in high-performance positions, which are limited in availability.

Advantage

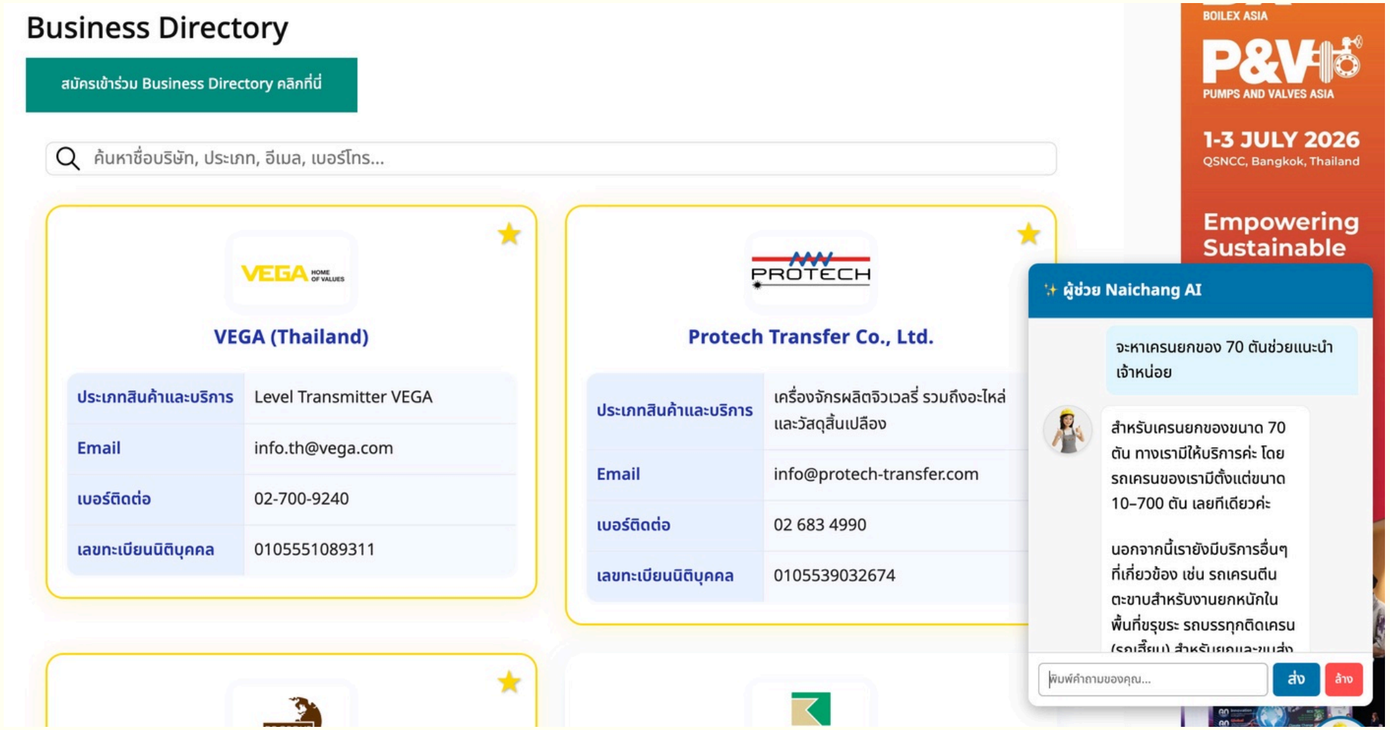

Content : ★★★☆☆

Awareness : ★★★★★

Engagement : ★★★★★

4. KNOWLEDGE VIDEO

Providing industrial knowledge content to ถ่ายทอด expertise and strengthen a company's brand image, helping build trust among partners and industrial factories.

Video content will be published across Facebook, YouTube, and TikTok platforms, with average performance of approximately 10,000–30,000 views per video.

The image content can also be used by clients for commercial purposes without copyright restrictions.

Advantage

Content : ★★★★★

Awareness : ★★★★★

Engagement : ★★★☆☆

FiiX MACHINE STORE

START UP

B2B ECOMMERCE PLATFORM

FiiX Store is a B2B industrial e-commerce platform designed to connect factories, engineers, buyers, suppliers, and industrial service providers through a modern digital ecosystem. The platform integrates Big Data, AI, and LLM (Large Language Model) technologies to improve industrial product searching and recommendation systems, helping businesses find the most suitable products and solutions faster, smarter, and more efficiently while reducing sourcing time and operational complexity. FiiX Store also supports industrial brands and solution providers in expanding their market reach and creating new business opportunities, with the vision of becoming the No.1 industrial B2B e-commerce and industrial technology platform in Thailand.
